

## CLEANING &amp; CARE

Zenbooths are made with the health and well-being of your team in mind. We have designed it with materials that are easy to disinfect and that maintain their color and finish for years to come. Go to [zenbooth.net/faq](https://zenbooth.net/faq) for more information.

## For all surfaces:

- With the exception of the skylight all surfaces can be cleaned with standard disinfectants and cleaners.
- Follow manufacturers instructions for any cleaning solutions.

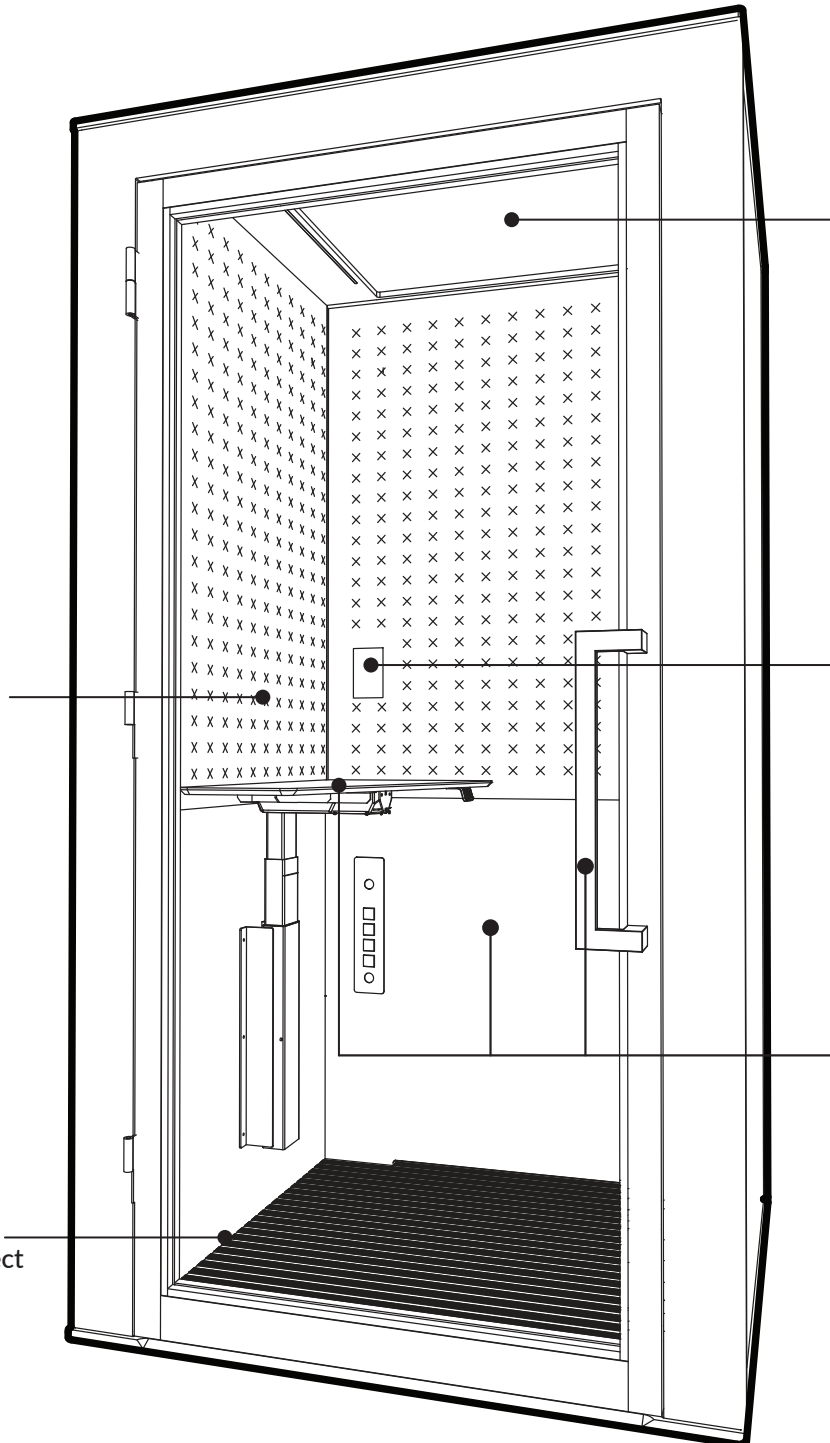

! If you use bleach or harsh chemicals prop the door open until odor dissipates.

## Felt Panels

- Spray cleaner on a cloth and blot surface. Scrubbing can cause the surface to fray.

## Floor &amp; Anti-Fatigue Mat

- Vacuum, clean and disinfect like other carpets/mats in your office.

## Skylight

- For best results use an antistatic acrylic cleaner.
- Can also be cleaned with soap and water.
- ! Don't use ammonia based cleaners on the skylight.

## Door Glass and Light Switch

- Clean and disinfect with standard glass cleaner.

All other hard surfaces  
(Including interior walls, door handle and desk)

- Use standard disinfectants and cleaners.
- ! Clean the handle and desk surface frequently.
